Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 6 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Cole (US 4398805).

Cole discloses a liquid crystal display (LCD) device (electronic device) comprising: a light generating element 60 providing backlight; a liquid crystal cell 11 (Applicant's transparent element) passing ambient light and backlight; a transfective element 30 directly adjacent to the liquid crystal cell passing the backlight and reflecting the ambient light [see Figures 1-2].

Cole discloses transfective element comprising a metallic material that has both reflective and transmissive characteristics (col. 2, last paragraph).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2871

2. Claims 2, 4-5, 7-8, 10-15, and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cole as applied to claims 1, 3, 6 and 9.

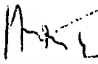

The use an electroluminescent (EL) light source is common and known in the art for advantages such as high transmission(brightness). Therefore, it would have been obvious to one of ordinary skill in the art to employ EL light source, as common and known in the art for advantages such as high transmission(brightness).

Electronic devices employing LCD is common and known in the art for advantages such as lightweight and flat display, high resolution. Therefore, it would have been obvious to one of ordinary skill in the art to employ LCD is common and known in the art for advantages such as lightweight, flat display. Also, the use of LCD to display labels (characters, alphanumeric, etc.) is common and known in the art for advantages such as lightweight and flat display, high resolution.
